- ✓ 3 msq of land per bag
- ✓ Ensures food safety
- ✓ Low water requirement
- ✓ Bags re-used up to 10 years
- ✓ Accessible for persons with Disabilities

VERTICAL BAG FARM SETUP INSTRUCTIONS

	LARGE BAG	MEDIUM BAG	TALL BAG	SMALL BAG
MANURE	8 Wheel barrows	4 Wheel barrows	3 Wheel barrows	1.5 Wheel barrows
SOIL	8 Wheel barrows	4 Wheel barrows	3 Wheel barrows	1.5 Wheel barrows
LIME	3 kgs	2 kgs	1.5 kgs	0.5 kgs
DAP	3 kgs	2 kgs	1.5 kgs	0.5 kgs
Trichoderma	20 ml	20 ml	20 ml	20 ml

1. Mix the soil and manure.

2. Add DAP (3 kg) and lime to the mixture.

3. Thoroughly mix the vertical bag farm soil media.

4. Spread the bag to identify the top, bottom and outer sections.

5. Turn the bag inside out and gather it in the middle part of the bottom part.

7. Fill the bag with the mixed media.

9. Continue filling your bag until you have an upright bag.

11. Place the curled section of the 16 mm riser pipe fitted with button drippers on the top of your bag.

6. Place the bag on the ground right side out.

8. Ensure you have a stable base at the bottom and that all holes are visible.

10. Wet the bag with 30 litres of water and start planting on the sides of the bag.

12. Plant lettuce, leeks, carrots, coriander, etc on the top section and you have your very own bag garden.

CONE GARDEN FARM SETUP INSTRUCTIONS

	EXTRA LARGE BAG	LARGE BAG	MEDIUM BAG	SMALL BAG
MANURE	8 Wheel barrows	6 Wheel barrows	3 Wheel barrows	1.5 Wheel barrows
SOIL	8 Wheel barrows	6 Wheel barrows	3 Wheel barrows	1.5 Wheel barrows
LIME	3 kgs	2 kgs	1 kgs	0.5 kgs
DAP	3 kgs	2 kgs	1 kgs	0.5 kgs
Trichoderma	20 ml	20 ml	20 ml	20 ml

1. Mix the soil and manure.

2. Add DAP (3 kg) and lime to the mixture.

3. Thoroughly mix the farm soil media.

4. Fill the cone with the mixed media

5. Add mixed media at the centre where you will place the second cone.

6. Place the second cone and let the mixed media remain inside the second cone
